EXPERIENCE

• Resumely

March 2025 - Present

Software Engineer / AI (Part-time) & Prompt Engineer (Intern)

Remote - Phnom Penh, Cambodia

◦ Software Engineer / AI (Part-time) | September 2025 - Present

- * Delivered the end-to-end Resume Customization feature, enabling users to instantly modify resume templates, fonts, and colors, and implemented a dynamic preview system to ensure an accurate, personalized, 'what-you-see-is-what-you-get' design experience.
- * Enhanced the Resume Generation Workflow by implementing a non-blocking process with browser and in-app notifications, preventing user interruption and allowing continuous background generation.

◦ Prompt Engineer (Intern) | March 2025 - September 2025

- * Built and refined AI prompt templates that produced more accurate and consistent LaTeX resume.
- * Wrote a program to convert AI-generated resume sections into complete resumes.
- * Tested and validated AI outputs using Postman, which ensured high-quality content delivery and minimized errors in the final product.
- * Developed a rule-based skill recommendation function using fuzzy string matching (FuzzyWuzzy) to map job titles to relevant skills, improving resume quality and user completion.
- * Built AI-powered cover letter generator with pre-defined templates, which empowered users to apply for jobs more efficiently.
- * Designed and built a simple job recommendation engine from the jobs websites that matches the users background.

EDUCATION

• Cambodia Academy of Digital Technology

B.Sc. in Computer Science

February 2023 - Present

Phnom Penh, Cambodia

- Techo Digital Talent Scholarship 2023
